

Business Requirement Document (BRD)

Module: Vehicle Service Appointment & Job Card Management

Requirement ID	BRD-VSM-001
Project	Vehicle Service Management System
Priority	High
Prepared By	Business Analyst
Version	1.0
Status	Draft

1. Business Objective

The organization requires an online system that allows customers to book vehicle service appointments, track service progress, and receive notifications. The service center should be able to assign technicians, generate job cards, update repair status, and calculate the final invoice.

2. Functional Requirements

1. Customer can schedule a service by selecting vehicle number, preferred date, and service type.
2. System shall prevent booking on holidays or when service capacity is full.
3. Service Advisor can approve or reschedule appointments.
4. Job Card shall be generated automatically after appointment confirmation.
5. Technician shall update repair progress as Pending, In Progress, Waiting for Parts, or Completed.
6. If additional repair work is required, customer approval must be captured before proceeding.
7. Final invoice shall include labour charges, spare parts cost, GST, discounts, and total payable amount.
8. SMS/Email notifications shall be sent for booking confirmation, job completion, and invoice generation.

3. Validation Rules

- Vehicle registration number must be unique and valid.
- Appointment date cannot be in the past.
- Only available technicians can be assigned.
- Invoice cannot be generated until service status is Completed.

4. Non-Functional Requirements

- Appointment search should respond within 2 seconds.

- Application should support 1000 concurrent users.
- All transactions must be stored in audit logs.
- Customer and payment information must be encrypted.

5. Acceptance Criteria

- Appointment is booked successfully with valid data.
- Duplicate bookings for the same vehicle and time slot are not allowed.
- Job card is generated immediately after approval.
- Invoice reflects actual labour and spare part charges.
- Notifications are sent successfully after each major event.

6. Out of Scope

Online payment gateway integration, warranty claim processing, and spare-part procurement are outside the scope of this release.
