

Business Requirement Document (BRD)

Enterprise Asset Management System

1. Introduction

ABC Manufacturing Pvt. Ltd. currently manages office assets using spreadsheets, emails and manual approvals. This creates duplicate records, missing assets and audit issues. The proposed Enterprise Asset Management System will provide a centralized platform to manage the complete lifecycle of assets from procurement until disposal.

2. Existing Process

Departments purchase assets independently. Asset allocation, transfers and maintenance are tracked manually. Reports are prepared in Excel, resulting in delays and inaccurate information during audits.
